

School menu planning made easy

We know you don't have much time to develop healthy and cost-effective school menus that your district needs - especially in the face of COVID-19 and changing service models.

Pro•Team can help by using Health-e Pro menu planning software, to build customized, fully compliant menus for your district, taking into consideration USDA foods, Farm to School, student favorites and regional preferences.

Our dietitians have the talent – and the tech – you need

Pro•Team's School Menu Solutions include the menu planning software, online production records, unique reports, interactive, online menus and support from our team of dietitians. Our partnership includes:

- Team of experienced dietitians
- Creative & compliant menus
- Save time, money and headaches
- Accessible online menus
- Easy administrative review

"With thousands of meals to be served a day at eight different sites, we recognized the need to streamline, track costs, analyze nutrient content, and reduce our 80-page inventory report to something manageable."

– Jamie Wilson, Director of Foodservice,
Superior School District (SSD), WI
